We are happy to celebrate more than 4,000,000 computer science publications in the dblp computer science bibliography.

dblp has consistently grown by 15% to 25% during each of the past years.

In 2017, again, about 400,000 new publications have been added to dblp.

In dblp, you can find publications from:

- 5,200+ conference and workshop series
- 1,500+ journal series
- 75,000+ table of contents

These papers have been authored by 2,000,000+ authors.

Of those authors, about 60,000 researchers have been manually identified and get their bibliography checked by the dblp team.

These authors' profiles list about 20% of all publications in dblp.

dblp author profiles are linked to:

- 60,000+ academic homepages
- 11,000+ ORCID IDs
- 2,500+ Google Scholar profiles
- 2,300+ Wikidata items
- 1,700+ Wikipedia articles
- and 5,500+ further IDs

Daily quality and content quality checks is of the highest importance to the dblp approach. Since 2005, 6,000,000+ edits have been made to the dblp project in order to correct, update, complete, and expand the database.

Each month, the dblp website is visited by 450,000+ users from all around the world.

On average, every 2 seconds another researcher starts working with dblp, visiting about 10 pages per session.

During peak times, the dblp website and search API often resolve 80+ requests per second.
