

We are happy to celebrate more than
5,000,000
computer science publications
in the dblp computer science bibliography!

The database has
doubled in size
during the course
of just **six years**.

In **2019**, about
450,000+ new
publications have
been added to dblp.

In dblp, you now find publications from ...

- **5,800+** conference and workshop series
- **1,600+** journals
- **90,000+** table of contents

These papers are credited to
2,400,000+
authors

Of those authors, about
120,000+ researchers
have been **manually**
identified and got their
bibliography **checked**
by the dblp team.

These bibliographies list
about 28% of all publications in dblp.

dblp bibliographies are linked to ...

- **59,000+** academic homepages
- **65,000+** ORCIDs
- **14,000+** Google Scholar profiles
- **34,000+** Wikidata items
- **5,600+** Wikipedia articles
- and **42,000+** further IDs

Data quality and constant quality control is of the highest
importance to the dblp approach. Since 1995,

9,600,000+ edits

have been made to existing records in the dataset in order
to **correct, update, complete, and expand** the metadata.

Our editorial team
is continuously
checking the
bibliographies
and **correcting**
misassigned
publications.

In 2019, **55,000+** error cases have been fixed.

Each month, the dblp website is visited by
650,000+ users from all around the world.

On average,
every 1.5 seconds
another researcher
starts working with
dblp, visiting about
19 pages/session.

During peak times, the dblp website and search API
receives **100+ requests per second**.
