We are happy to celebrate more than 5,000,000 computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of just six years.

In 2019, about 450,000 new publications have been added to dblp.

In dblp, you can find publications from...
- 5,800+ conference and workshop series
- 1,600+ journals
- 90,000+ table of contents

These papers are credited to 2,400,000+ authors.

Of these authors, about 120,000 researchers have been manually identified and put their bibliographies checked by the dblp team.

These bibliographies are linked to...
- 59,000+ academic homepages
- 65,000+ orcidIDs
- 34,000+ Google Scholar profiles
- 24,000+ Wikipedia pages
- 5,600+ Wikipedia articles
- 42,000+ further IDs

Data quality and content quality control is of the highest importance to the dblp approach. Since 2001, 9,600,000+ edits have been made to assist authors in the dataset in order to correct, update, categorize, and expand the entries.

Our editorial team is continuously checking the bibliographies and correcting misspelled publications.

In 2019, 55,000+ error cases have been fixed.

Each month, the dblp website is visited by 650,000+ users from all around the world.

On average, every 3.2 seconds a new researcher starts working with dblp, visiting about 19 pages/session.

During peak times, the dblp website and search API receives 100+ requests per second.
