We are happy to celebrate more than 5,000,000 computer science publications in the dblp computer science bibliography.

In 2019, about 450,000+ new publications have been added to dblp.

In dblp, you can find publications from...
- 5,800+ conference and workshop series
- 1,600+ journals
- 90,000+ table of contents

There are papers authored by 2,400,000+ authors.

Of those authors, about 120,000 researchers have been manually identified and got their bibliographies checked by the dblp team.

These bibliographies form about 28% of all publications in dblp.

 dblp bibliographies are linked to...
- 59,000+ academic homepages
- 65,000+ ORCIDs
- 24,000+ Google Scholar profiles
- 24,000+ DBLP homepages
- 5,600+ Wikipedia articles
- and 42,000+ further IDs

Data quality and content quality control is of the highest importance to the dblp approach. Since 2001, 9,600,000+ edits have been made to assist researchers in the database in order to correct, update, organize, and expand the entries.

Our editorial team is continuously checking the bibliographies and correcting misnamed publications.

In 2019, 55,000+ error cases have been fixed.

Each month, the dblp website is visited by 650,000+ users from all around the world.

On average, every 1.5 seconds another researcher starts working with dblp, visiting about 19 pages/session.

During peak times, the dblp website and search API receives 100+ requests per second.
