We are happy to celebrate more than 5,000,000 computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of just six years.
In 2019, about 450,000+ new publications have been added to dblp.

In dblp, you now find publications from...
- 5,800+ conference and workshop series
- 1,600+ journals
- 90,000+ table of contents

These papers are credited to 2,400,000+ authors

Of these authors, about 120,000 researchers have been manually identified and got their bibliographies checked by the dblp team.

These bibliographies form about 28% of all publications in dblp.

dblp bibliographies are linked to...
- 59,000+ academic homepages
- 55,000+ ORCIDs
- 24,000+ Google Scholar profiles
- 24,000+ Winnames entries
- 5,600+ Wikipedia articles
- and 42,000+ further IDs

Data quality and content quality control is of the highest importance to the dblp approach. Since 2002, 9,600,000+ edits have been made to existing records in the database in order to correct, update, aggregate, or expand the metadata.

Our editorial team is continuously checking the bibliographies and correcting mislabelled publications.

In 2019, 55,000+ error cases have been fixed.

Each month, the dblp website is visited by 650,000+ users from all around the world.

On average, every 1.5 seconds another researcher starts working with dblp, visiting about 10 pages/session.

During peak times, the dblp website and search API receive 100+ requests per second.
