We are happy to celebrate more than 5,000,000 computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of just six years. In 2019, about 450,000 new publications have been added to dblp.

In dblp, you can find publications from...
- 5,800 conference and workshop series
- 1,600 journals
- 90,000 table of contents

These papers are authored by 2,400,000 authors.

Of these authors, about 120,000 researchers have been manually identified and got their bibliographies checked by the dblp team.

These bibliographies fall about 28% of all publications in dblp.

Dblp bibliographies are linked to...
- 59,000 academic homepages
- 55,000 ORCID
- 54,000 Google Scholar profiles
- 24,000 Wikidata items
- 5,600 Wikipedia articles
- and 42,000 further IDs

Data quality and content quality control is of the highest importance to the dblp group. Since 2002, 9,600,000 edits have been made to assist in correcting errors, inserting new data and expanding the metadata.

Our editorial team is continuously checking the bibliographies and correcting misspelled publications.

In 2019, 55,000 error cases have been fixed.

Each month, the dblp website is visited by 650,000 users from all around the world.

On average, every 3.5 seconds another researcher starts working with dblp, visiting about 19 pages/session.

During peak times, the dblp website and search API receives 100+ requests per second.
