We are happy to celebrate more than **5,000,000** computer science publications in the dblp computer science bibliography!

The database has doubled in size during the course of just six years.

In 2019, about **450,000+ new publications** have been added to dblp.

In dblp, you can find publications from...

- **5,800+ conference and workshop series**
- **1,600+ journals**
- **90,000+ table of contents**

These papers are credited to **2,400,000+ authors**

Of those authors, about 120,000+ researchers have been manually identified and got their bibliography checked by the dblp team.

These bibliographies fill about 28% of all publications in dblp.

Dblp bibliographies are linked to...

- **59,000+ academic homepages**
- **55,000+ ORCIDs**
- **34,000+ Google Scholar profiles**
- **24,000+ Wikidata items**
- **5,600+ Wikipedia articles**
- **and 42,000+ further IDs**

Data quality and content quality control is of the highest importance to the dblp approach. Since 2003, **9,600,000+ edits** have been made to assist researchers in their work in order to correct, update, categorize, and expand the metadata.

Our editorial team is continuously checking the bibliographies and correcting missyped publications.

In 2019, **55,000+ error cases** have been fixed.

Each month, the dblp website is visited by **650,000+ users** from all around the world.

On average, every 3.5 seconds another researcher starts working with dblp, visiting about 15 pages/session.

During peak times, the dblp website and search API receives 100+ requests per second.
