dblp computer science bibliography

We are happy to celebrate more than 5,000,000 computer science publications in the dblp computer science bibliography.

Our database has doubled in size during the course of just six years.

In 2019, about 450,000+ new publications have been added to dblp.

In dblp, you can find publications from:

- **5,800+** conference and workshop series
- **1,600+** journals
- **90,000+** table of contents

These papers are credited to **2,400,000+** authors.

Of those authors, about 120,000+ researchers have been manually identified and put their bibliography checked by the dblp team.

These bibliographies fun about 28% of all publications in dblp.

dblp bibliographies are linked to:

- **9,000+** academic homepages
- **66,000+** ORCID IDs
- **54,000+** Google Scholar profiles
- **26,000+** Wikipedia pages
- **5,600+** Wikipedia articles
- and 42,000+ further IDs

Data quality and content quality control is of the highest importance to the dblp approach. Since 2013, dblp has received 9,600,000+ edits to keep these records accurate and up-to-date.

Our editorial team is continuously checking the bibliographies and correcting misleading publications.

In 2019, 55,000+ error cases have been fixed.

Each month, the dblp website is visited by 650,000+ users from all around the world.

On average, every 3.5 seconds another researcher starts working with dblp, visiting about 19 pages/session.

During peak times, the dblp website and search API receives 100+ requests per second.
