We are happy to celebrate more than 5,000,000 computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of just six years. In 2019, about 450,000 new publications have been added to dblp.

In dblp, you can find publications from...
- 5,800+ conference and workshop series
- 1,600+ journals
- 90,000+ table of contents

These papers are credited to 2,400,000+ authors.

Of those authors, about 120,000 researchers have been manually identified and got their bibliography checked by the dblp team.

These bibliographies form about 28% of all publications in dblp.

dblp bibliographies are linked to...
- 99,000+ academic homepages
- 65,000+ ORCIDs
- 34,000+ Google Scholar profiles
- 24,000+ WoS publications
- 5,600+ Wikipedia articles
- and 42,000+ further IDs

Data quality and content quality control is of the highest importance to the dblp approach. Since 2001, 9,600,000+ edits have been made to assist accuracy in the dataset in order to correct, update, categorize, and expand the bibliographies.

Our editorial team is continuously checking the bibliographies and correcting misspelled publications.

In 2019, 55,000+ error cases have been fixed.

Each month, the dblp website is visited by 650,000+ users from all around the world.

On average, every 13.5 seconds another researcher starts working with dblp, visiting about 19 pages/session.

During peak times, the dblp website and search API receive 100+ requests per second.
