

We are happy to celebrate more than
6,000,000
computer science publications
in the dblp computer science bibliography!

The database has
doubled in size
during the course
of **seven years**.

In **2021** alone,
520,000+ new
publications have
been added to dblp.

In dblp, you now find publications from ...

- **5,800+** conference and workshop series
- **1,800+** journals
- **100,000+** table of contents

These papers are credited to
2,900,000+
authors

Of those authors, about
165,000+ researchers
have been **manually**
identified and got their
bibliography **checked**
by the dblp team.

These curated bibliographies list
about 31% of all publications in dblp.

rest of
bibliographies
with just one
publication.

dblp bibliographies are linked to ...

- **51,000+** academic homepages
- **102,000+** ORCIDiS
- **20,000+** Google Scholar profiles
- **51,000+** Wikidata items
- **6,600+** Wikipedia articles
- and 64,000+ further IDs

Data quality and constant quality control is of the highest
importance to the dblp approach. Since 1995,

13,200,000+ edits

have been made to existing records in the dataset in order
to **correct, update, complete, and expand** the metadata.

Our editorial team
is continuously
checking the
bibliographies
and **correcting**
misassigned
publications.

In 2021, **72,000+** error cases have been handled.

Each month, the dblp website is visited by
750,000+ users from all around the world.

During peak times, the dblp website and search API
receives **150+ requests per second**.

Since
700+ days
the dblp team is
working from home

"thanks" to CoViD-19

(with exactly not that much noticeable impact
on the performance of dblp at all)
