We are happy to celebrate more than 6,000,000 computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of seven years.

In 2023 alone, 320,000+ new publications have been added to dblp.

In dblp, you can find publications from...
- 5,800+ conference and workshop series
- 1,800+ journals
- 100,000+ tables of contents

Of those authors, about 165,000+ researchers have been manually identified and are being automatically checked by the dblp team.

These surveys and bibliographies contain about 31% of all publications in dblp.

dblp bibliographies are linked to...
- 51,000+ academic homepages
- 102,000+ ORCIDIs
- 30,000+ Google Scholar profiles
- 51,000+ Wikidata items
- 5,600+ Wikipedia articles
- and 44,000+ further IDs

Some quality and content quality control is also done for these links. Since 2016, 13,200,000+ edits have been made in working software in the latest order to correct, update, complete, and expand the metadata.

Our editorial team is continuously checking the bibliographies and correcting misclassified publications.

In 2023, 72,000+ error cases have been handled.

Each month, the dblp website is visited by 750,000+ users from all over the world.

During peak times, the dblp website and search API receives 100+ requests per second.

Since 700+ days,
- The dblp team is working front home
-蹉跎，to COVID-19
