We are happy to celebrate more than **6,000,000** computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of seven years.
In 2023 alone, 520,000 new publications have been added to dblp.

In dblp, you can find publications from...

- **5,800+** conference and workshop series
- **1,800+** journals
- **100,000+** tables of contents

These papers are credited to **2,900,000+** authors.

Of these authors, about 160,000+ researchers have been manually identified and got their contribution checked by the dblp team.

These so-called bibliographies list about 37% of all publications in dblp.

dblp bibliographies are linked to...

- **51,000+** academic homepages
- **102,000+** ORCID IDs
- **30,000+** Google Scholar profiles
- **51,000+** Wikidata items
- **6,600+** Wikipedia articles
- **66,000+** further IDs

Some quality and content quality control is of the highest importance for the dblp network. Since 2015, **13,300,000+ edits** have been made in working sessions to the dataset in order to correct, update, complete, and expand the resources.

Our editorial team is continuously checking the bibliographies and correcting misparsed publications.

In 2022, **72,000+ error cases** have been handled.

Each month, the dblp website is visited by **750,000+ users** from all around the world.

During peak times, the dblp website and couch.dbp receives **150+ requests per second**.

Since **700+ days**

We still work on

*Pandora’s box* to COVID-19
