We are happy to celebrate more than 6,000,000 computer science publications on the dblp computer science bibliography.

The database has doubled in size during the course of seven years.

In 2023 alone, 520,000+ new publications have been added to dblp.

In dblp, you now find publications from ...
- 5,800+ conference and workshop series
- 1,800+ journals
- 100,000+ table of contents

These papers are credited to 2,900,000+ authors.

Of these authors, about 165,000+ researchers have been manually identified and got their extractions checked by the dblp team.

These extracted bibliographies are the about 51% of all publications in dblp.

dblp bibliographies are linked to ...
- 51,000+ academic homepages
- 102,000+ ORCID
- 20,000+ Google Scholar profiles
- 51,000+ Wikipedia articles
- 6,600+ further IDs

Due to quality and compliance, quality control is of the highest importance for the dblp approach. Since 2009, 13,200,000+ edits have been made in working sessions in the platform in order to correct, update, complete, and expand the metadata.

Our editorial team is continuously checking the bibliographies and correcting mislabeled publications.

In 2023, 72,000+ error cases have been handled.

Each month, the dblp website is visited by 750,000+ users from all around the world.

Since 700+ days
- The dblp team is working from home
- "Thanks" to COVID-19

During peak times, the dblp website and search API receives 100+ requests per second.
