We are happy to celebrate more than 6,000,000 computer science publications in the dblp computer science bibliography.

The database has doubled in size during the course of seven years.

In 2023 alone, 525,000+ new publications have been added to dblp.

In dblp, you can find publications from...

- 5,800+ conference and workshop series
- 1,800+ journals
- 100,000+ table of contents

These papers are credited to 2,900,000+ authors.

Of these authors, about 165,000+ researchers have been manually identified and got their entries checked by the dblp team.

These records account for about 35% of all publications in dblp.

dblp bibliographies are linked to...

- 151,000+ academic homepages
- 102,000+ ORCIDIs
- 20,000+ Google Scholar profiles
- 51,000+ Wikidata items
- 6,600+ Wikipedia articles
- 66,000+ further IDs

Some quality control REST API, is a web-based tool for the database administrator. Since 2012, 13,300,000+ edits have been made to improve articles in the database in order to correct, update, and expand the material.

Our editorial team is continuously checking the bibliographies and correcting misindexed publications.

In 2023, 72,000+ error cases were handled.

Each month, the dblp website is visited by 750,000+ users from all around the world.

During peak times, the dblp website and each API receives 130+ requests per second.

Since 700+ days,

- the team is working from home
- "Tweets" to COVID-19
