We are happy to celebrate more than 6,000,000 computer science publications on the dblp computer science bibliography.

The database has doubled in size during the course of seven years.

In 2023 alone, 525,000+ new publications have been added to dblp.

In dblp, you can find publications from...
- 5,800+ conference and workshop series
- 1,800+ journals
- 100,000+ tables of contents

These papers are credited to 2,900,000+ authors.

Of these authors, about 155,000+ researchers have been manually identified and are their paper count checked by the dblp team.

These are selected theses: the about 31% of all publications in dblp.

dblp bibliographies are linked to...
- 51,000+ academic homepages
- 102,000+ ORCIDis
- 20,000+ Google Scholar profiles
- 51,000+ Wikipedia articles
- 6,600+ further IDs

Some quality and quantity quality control is of the highest importance for the dblp team. First ORCIDs,
13,200,000+ edits have been made to submit records in the past 12 months in order to correct, update, complete, and expand the metadata.

Our editorial team is continuously checking the bibliographies and correcting misspelled publications.

In 2023, 72,000+ error cases have been handled.

Each month, the dblp website is visited by 750,000+ users from all around the world.

Since 700+ days,
- the dblp team is working from home
- “Thanks” to COVID-19

During peak times, the dblp website and search API receives 150+ requests per second.

Since 700+ days, the dblp team is working from home. "Thanks" to COVID-19.
