

We are happy to celebrate more than
7,000,000
 computer science publications
 in the dblp computer science bibliography!

The database has
 doubled in size
 over the course
 of seven years.

In 2023 alone,
550,000+ new
 publications have
 been added to dblp.

In dblp, you now find publications from ...

- **6,500+** conference and workshop series
- **1,850+** journals
- **115,000+** table of contents
- **142,000+** monographs, theses, and textbooks

Of those authors, about
227,000+ researchers
 have been manually
 identified and had their
 bibliography checked
 by the dblp team.

These curated bibliographies list
 about **34% of all publications** in dblp.

These works are credited to
3,400,000+
 authors.

dblp bibliographies are linked to ...

- **59,000+** academic homepages
- **146,000+** ORCIDs
- **28,000+** Google Scholar profiles
- **66,000+** Wikidata items
- **8,000+** Wikipedia articles
- and 72,000+ IDs from 25+ further sites

The semantic
 information and
 resource links
 stored in dblp
 form a **research
 knowledge graph**.

The **dblp Knowledge Graph** contains ...

- **380,000,000+** semantic statements (RDF triples)
- **9,400,000+** linked external resources

Data quality and constant quality control is of the highest
 importance to the dblp approach. Since 1995,

16,000,000+ edits

have been made to existing records in the dataset in order
 to **correct, update, complete, and expand** the metadata.

Our editorial team
 is continuously
**checking the
 bibliographies**
 and correcting
 misassigned
 publications.

In 2023, **70,000+** error cases have been handled.

Each month, the dblp websites are visited by
750,000+ users from all around the world.

During peak times, the dblp websites and search APIs
 receive **200+ requests per second**.
