The database has doubled in size over the course of seven years.
In 2023 alone, 550,000+ new publications have been added to dblp.

- 6,500+ conference and workshop series
- 1,850+ journals
- 115,000+ table of contents
- 162,000+ monographs, theses, and textbooks

These works are attributed to 3,400,000+ authors.

Of those authors, about 2,500,000 users have been manually identified and had their bibliographies checked by the dblp team.

These complete bibliographies list about 24% of all publications in dblp.

dblp bibliographies are linked to ...
- 18,000 academic homepages
- 30,000+ ORCID profiles
- 28,000 Google Scholar profiles
- 48,000 Wikipedia pages
- 8,000+ Wikipedia articles
- and 72,000+ IDs from 25+ further sites

The semantic information and resource links stored in dblp form a research knowledge graph.

The dblp Knowledge Graph contains ...
- 10,000,000+ semantic statements on various 9,000+ related external resources

Since 2014, our crawlers follow publication links on the fly to find the highest-importance external resources. Since then, 16,000,000+ edits have been made to keep the graph up to date.

Our editorial team is continuously checking the bibliographies and correcting misrepresented publications.

In 2021, 70,000+ error cases have been handled.

Each month, the dblp website is visited by 750,000+ users from all around the world.
