The database has doubled in size over the course of seven years.

In 2023 alone, 550,000+ new publications have been added to dblp.

In dblp, you can find publications from...
- 6,500+ conference and workshop series
- 1,850+ journals
- 115,000+ table of contents
- 162,000+ monographs, theses, and textbooks

These works are authored by 3,400,000+ authors.

Of these authors, about 215,000 authors have been manually identified and had their bibliography checked by the dblp team.

These current bibliographies list about 24% of all publications in dblp.

dblp bibliographies are linked to...
- 15,000+ academic homepages
- 116,000+ ORCIDIs
- 28,000+ Google Scholar profiles
- 84,000+ Wikidata items
- 8,000+ Wikipedia articles
- and 72,000+ IDs from 25+ further sites

The semantic information and resource links present in dblp form a research knowledge graph.

The dblp Knowledge Graph contains...
- 350,000,000+ semantic statements on over 9,500,000+ related external resources

Our Athena project is continuously checking the bibliographies and correcting mismatched publications.

In 2023, 70,000+ error cases have been handled.

Each month, the dblp website is visited by 750,000+ users from all around the world.

In peak times, the dblp website and search API receive 200+ requests per second.
